## LF Drivers - 15.0 Inches

- 3000 W continuous program power capacity
- 100 mm (4 in) four layer aluminium voice coil
- 39-1000 Hz response
- 96.8 dB sensitivity
- Double silicone spider with optimized compliance
- Ventilated voice coil gap for reduced power compression
- Aluminium demodulating ring for very low distortion

This next evolution subwoofer uses a new, longer, four layer aluminum voice coil. The result is less heat, more energy in the gap, higher sensitivity, higher power handling, lower distortion and better overall performance. The 15DS 100 features a 37 mm long, 4 inch diameter ( 100 mm ) Copper Clad Aluminum Wre voice coil. With a 1500 watt AES power rating, 96.8 dB sensitivity, and over 14.0 mm of Xvar, this high energy subwoofer is a significant step forward from similar models in the B\&C range.

## SERVICE KIT

1. 2 hours test made with continuous pink noise signal within the range Fs-10Fs. Power calculated on rated minumum impedance. Loudspeaker in free air.
2. Power on Continuous Program is defined as 3 dB greater than the Nominal rating.
3. Applied RMS Voltage is set to 2.83 V for 8 ohms Nominal Impedance.
4. Thiele-Small parameters are measured after a high level 20 Hz sine wave preconditioning test.
